## Evening Brief

Date: Monday July 23 , 2018

---

### Weather Summary

Scattered showers and thunderstorms will develop across UT, NV, and the AZ strip Tuesday and Wednesday afternoons. The majority of the storms will be accompanied by wetting rain, though some dry storms are possible across portions of northern NV and far SW ID. Thunderstorm coverage will increasingly become confined to the southern portion of the Great Basin Thursday and into the weekend as drier air moves into the northern part of the area.

Warm, dry and breezy conditions will exist across much of Idaho through the week.

---

### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	3	Light-Moderate Initial Attack Activity
National	4	New Fires and Acres: 26 fires for 3,819.9 acres; 1,051 acres large fire growth

---

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

**Fuels and Fire Behavior advisory has been issued for [Nevada](#)**

### Fire Potential

Sagebrush live fuel moisture values are near to below normal across Utah, Southern Nevada and the AZ Strip however have flattened out or begun to increase due to the recent persistent moisture. Elsewhere across the geographic area the sagebrush live fuel moisture values are closer to normal or even above normal for mid-July, but have peaked and are on the downward trend rapidly due to recent hot/dry weather.

Fire danger values continue to drop over much of Nevada, Utah, and the AZ Strip, with most areas below the 50th percentile to the 70th percentile in the north. Continued higher humidity and scattered wetting rains the next few days will minimize any ignitions from growing rapidly.

The significant carryover fuels from 2017 and additional critically dry fine fuel crops from the spring rains in western/northern NV into parts of southern ID/western UT are still significantly contributing to fire spread after just a few dry days. Sagebrush fuel moisture continues to decrease in these areas with fuel moisture now below critical levels across parts of northern NV into Idaho and contributing to fire spread.

#### Resources:

##### Aviation within the Great Basin

- 1 VLAT, 4 LATs
- 21 SEATs
- 11 Type 1 Helicopters / 9 Committed
- 10 Type 2 Helicopters / 7 Committed
- 22 Type 3 Helicopters / 19 Committed

##### Crews Committed within the Great Basin

- 13 IHCs Committed / 3 Available
- 28 T-2 IAs Committed / 7 Available

## Current Incident Details
